

IT Assistant

Admission Portfolio for Master
of Engineering, Virtual Worlds

Ayesha Saddiqa Kakepoto

IT Professional | Construction Technology | Future Virtual Worlds
Engineer

ABOUT ME

Technology has always been about more than just repairing and replacing computers for me; it's about problem solving and working better. My working experience in the construction industry initiated my interest around the new technologies like Artificial Intelligence, 3D environments and Virtual Worlds. My focus right now is on learning and developing new solutions that integrate engineering with immersive digital technologies.

EXPERIENCE

IT Assistant

- Company: Benchmark Builders & Contractors Pvt. Ltd.
- Industry: Construction
- Employment Period: 2022 – 15 January 2026

EDUCATION

B.Sc in computer science
2006 Islamia University, Pakistan

Bachelor of Engineering and Industrial Management (In Progress)

Turku University of Applied Sciences, Finland

Certification

PMP (PMI)
Lean six sigma (yellow belt)
Scrum for Ops and DevOps Fundamentals
Ms Excel365 Functions Harnessing
Power BI Harness The Master of Power BI

Technical Skills

-  IT Support
-  Windows Administration
-  Networking
-  Hardware Maintenance
-  Microsoft Office
-  Problem Solving

PROJECT 1

IT INFRASTRUCTURE SUPPORT

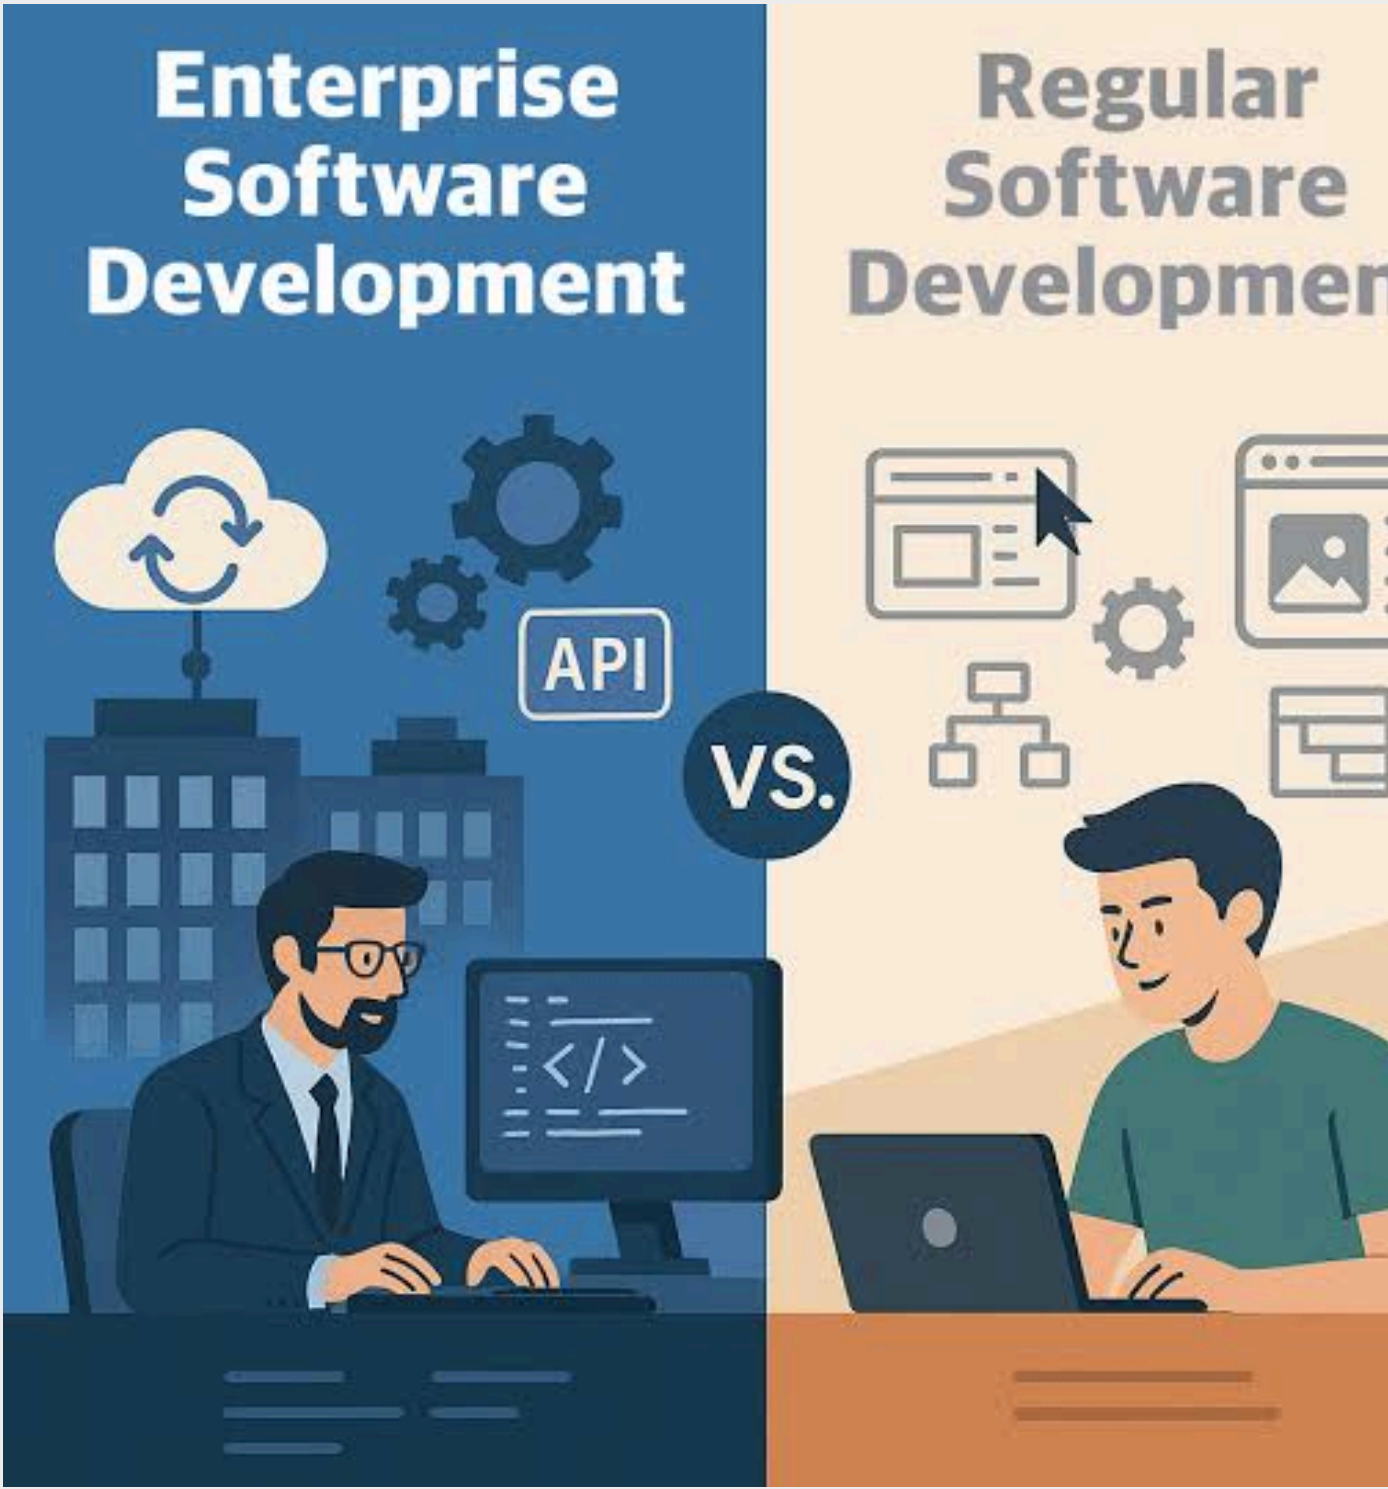

Supported the daily IT infrastructure of Benchmark Builders & Contractors Pvt. Ltd. by installing, configuring, and maintaining computer systems, software, and peripheral devices. Ensured reliable IT operations by providing technical support and resolving hardware and software issues for office staff.

PROJECT 2

Business Software Development and System Upgrade.

Supported the implementation and maintenance of enterprise software by installing updates, configuring user systems, and assisting employees during software upgrades. Helped ensure smooth system performance, compatibility, and minimal disruption to daily business operations.

PROJECT 3

Digital File and Data Management Optimization

Assisted in organizing and maintaining digital files and company data by improving file management practices, supporting data backup activities, and ensuring information was stored securely and could be accessed efficiently by authorized employees.

FUTURE GOALS

My goal is to combine my IT experience with Artificial Intelligence, Digital Twins, and Virtual Worlds to develop smarter and more innovative solutions for the construction industry. Through a Master's in Engineering – Virtual Worlds, I aim to build advanced skills in 3D technologies and AI to support the future of engineering.

Career Vision

To become an Engineering Technology Specialist developing AI-powered and immersive digital solutions that improve construction planning, collaboration, and project management.
